FULLY AUTOMATIC PARKING SYSTEM

Parkarti

Excellent parking solution for small floor plan area and slim construction by moving left-right-front-back position with high speed.

No need to have space-intensive ramps or driveways. Future environmental and energy saver parking ideas especially for the houses.

Use your space more productively, More parking in less space...Quick park and retrieve car with advanced but simple user interface.

Parkarti ADVANTAGES

- Reduce CO2 emissions by 85% or more by eliminating the need for cars to drive and idle while searching for parking spaces.
- Available for apartment, office building, public parking
- Ground or underground placing and well-adapted solution to individual project requirements

COMFORT

- Ease of finding parking space exactly at the desired location without having to drive in heavy city traffic.
- Suitable for the use of disabled people, easy parking at the large entry room.
- Parking without manoeuvring difficulties, using inconvenient ramps and corridors for getting to/exiting from the parking floors.
 - Safe and secure parking away from risks such as theft, accidents, etc.

OPERATION

- Minimum personnel requirements.
- Ventilation and lighting savings (No exhaust gas formation, no people inside the parking lot).
- High insurance availability thanks to high safety level.

SAFETY

- 2006/42/EC Machinery Directive

STANDARD

- EN 14010
- CE Certificate

Parkarti
